FEATURE / CHANGE REQUEST FORM

Internal IT / Application Development Request

Requester Name	Ganjar Ahfadan
Department / Division	Quality Control
Date of Request	21 October 2026
Document Number	*CMX-IPC-SCR-211026-1-1*
Target Delivery Date	26 October 2026

1. Feature Request Details

1.1 Request Location (Menu / Submenu Identification)
1.2 Request Summary
1.3 Detailed Feature Specification

Target Application Name	QC IPC-FG Digital Web Report
Target Menu / Submenu	Start Up Filling / Start Up Packing / Start Up Lengkap

Request Title
Improvement of QC IPC-FG Digital Web Report: Form Menu Adjustment and Process-Based Report Separation

Request List
1. Start Up Filling: remove the “Masterbox Weighing” menu. 2. Start Up Packing: remove the “Product Filling Weight” menu. 3. Separate the reports into three categories: a. Start Up Filling – Filling Process. b. Start Up Packing – Packing Process. c. Start Up Lengkap – Filling & Packing Process.

Current Behaviour
1. When production runs only the filling process, QC is still required to complete the packing form using temporary data or a result of 0. 2. When production runs only the packing process, QC is still required to complete the filling form using temporary data or a result of 0. 3. The current reporting workflow combines different production processes, making the documentation less structured and not fully aligned with actual line activities.

Proposed Behaviour / Feature
1. Adjust the form menus based on the applicable production process: a. Start Up Filling: display filling-related fields only and remove “Masterbox Weighing”. b. Start Up Packing: display packing-related fields only and remove “Product Filling Weight”. 2. Provide separate report categories: a. Start Up Filling – Filling Process. b. Start Up Packing – Packing Process. c. Start Up Lengkap – Filling & Packing Process. 3. Allow QC to complete only the form/report relevant to the process actually performed, without entering temporary zero values for a process that is not running. Ensure the resulting reports are organized and reflect actual production-line activities.

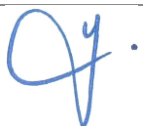

2. Priority and Impact

Priority Level	Selection	Description
Critical	☐	Blocks essential operations; immediate action required.
High	☐	Significant impact on user experience or core business process.
Medium	☒	Desirable improvement; not immediately blocking.
Low	☐	Minor enhancement or cosmetic change.

3. Additional Notes / Attachments

Notes, References, or Attachments
This request is intended to improve reporting accuracy, documentation structure, and operational efficiency by aligning the digital QC report with the actual production flow. No mockup is attached; the requested changes are described above. Target delivery date to be confirmed with the IT Team.
